DETAILED ACTION

1. Applicant's amendment of claims 18 in the paper filed on 02/16/2009 is acknowledged.

Claims 18-21 are pending and at issue.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Rejection Maintained

Claim Rejections Maintained - 35 USC § 103

2. The rejection of claims 18-21 under 35 U.S.C. 103(a) as being unpatentable over Critchley (19.09.2002), Buck et al. (1999), and Mackay et al. (March 15, 2002); as evidenced by Froguel et al. (1993) and by Howell et al. (1999) is maintained.

Applicant's arguments have been fully considered but they are not persuasive.

Applicant argues that the claimed probe sequences have greater than expected results by detecting the mitochondrial DNA 3243 mutation whereas other tested probes did not detect the mutation. However, Critchley expressly teaches the mitochondrial DNA 3243 mutation in disclosed sequence 13 and teaches probes to this sequence and further references Froguel et al. and Howell et al. who teach methods of detecting such mutations. Buck et al. teach that primers and probe sequences can be selected along any known sequence. Thus it would have been obvious to one of ordinary skill in the art to optimize probe sequences for detection of the mitochondrial DNA 3243 mutation.

Application/Control Number: 10/553,576 Page 3

Art Unit: 1637

Based upon the teachings of the prior art, Applicant's optimization of such a probe is not unexpected and no evidence has been provided that the optimization was other than routine at the time of the claimed invention.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art.

See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the specific mutation and the sequence in which it is found are disclosed by Critchley who also provide motivation to detect it by disclosing the usefulness of detection as an indicator of disease. Buck et al. teach the success of selecting probes and primers along any known sequence. And Froguel et al. and Howell et al. both teach methods of detecting DNA mutations. Thus the combined teachings show that one of ordinary skill in the art at the time of the claimed invention would have been motivated to optimize probes for detection of the mutation with a reasonable expectation of success.

Conclusion

- 3. No claim is free of the prior art.
- 4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 10/553,576 Page 4

Art Unit: 1637

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Staples whose telephone number is (571) 272-9053. The examiner can normally be reached on Monday through Thursday, 9:00 a.m. to 6:00 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion can be reached on (571) 272-0782. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
